ALHASSAN SULAIMAN
Full-Stack MVP Developer | AI-Assisted Product Development

Alhassansulaiman1369@gmail.com .

Full-stack developer focused on building and shipping web and mobile MVPs from idea to working product. Experienced in developing real-world applications with modern frontend and backend technologies, integrating APIs and third-party services, building authentication and administrative systems, and deploying applications for users. Uses AI-assisted development tools such as Replit to accelerate development while maintaining control over application architecture, functionality, and code quality.
